Hazardous Substances for Managers and Supervisors

SAFETY'N ACTION

AXIOM TRAINING

Safe management of hazardous substances for leaders responsible for chemical storage, handling, and worker safety.

Capacity
12 attendees

Duration
1 Day (8 Hours)

Locations
At our local training centre
At your own site or workplace

Overview

This course is designed for managers and supervisors responsible for the storage, handling, and oversight of hazardous substances in the workplace. Learners gain the knowledge needed to safely manage hazardous substances, understand their risks to people and the environment, and meet compliance requirements under New Zealand health and safety legislation. Topics include HSNO and GHS classifications, risk management and controls, safety data sheets (SDS), emergency response, and monitoring requirements.

Course Content

- Explain how hazardous substances are classified under HSNO and GHS systems and interpret hazard information.
- Identify the potential acute and chronic health effects and environmental impacts of hazardous substances.
- Apply the hierarchy of controls to manage risks associated with hazardous substances in the workplace.
- Interpret Safety Data Sheets (SDS) to determine safe handling, storage, emergency response, and disposal requirements.
- Implement organisational procedures to support safe storage, handling, monitoring, and emergency management of hazardous substances.
- Meet supervisory and managerial responsibilities under the Health and Safety at Work Act 2015 when managing hazardous substances.

Unit Standards

Unit 31290 Demonstrate knowledge of safe management and potential adverse effects of hazardous substances in the workplace
