TRAINING

Capacity

12 attendees

Duration

2 Days (16 Hours)

Locations

At our local training centre
At your own site or workplace

Overview

This course will guide you through the selection and inspection of various fall arrest systems and relevant ropes and knots. There are also practical scenarios to ensure you understand the use, installation and disestablishment of proprietary height safety systems, anchor points, work positioning, restraint systems and developing and implementing a rescue plan. We also cover hazards associated with scaffolds, mobile elevated work platforms, ladders, guardrails, walkways, ramps and stairways.

Course Content

- ✓ Explain the legislative requirements and systems used for working at heights
- ✓ Demonstrate knowledge of hazards associated with wearing a safety harness and associated equipment
- ✓ Demonstrate knowledge of safety harnesses and associated systems and equipment
- ✓ Check and fit a safety harness system
- ✓ Use a safety harness system where a fall hazard exists at height
- ✓ Demonstrate knowledge of the rescue plan to be activated in the event of a fall
- ✓ Identify the common types of height safety equipment used in the workplace
