Hazard and Risk Management

Effective hazard and risk management reduces the chance of harm occurring, resulting in a safer and more productive workplace for you and your team

Hazard and Risk Management

Effective hazard and risk management reduces the chance of harm occurring, resulting in a safer and more productive workplace for you and your team.

This course will give you the knowledge and skills required to effectively assess the level of risk associated with workplace hazards, enabling you to identify and prevent potential illness, injury or incidents in your workplace.

This course is suitable for any person required to identify and manage risk within the workplace regardless of industry type.

Key Learning Outcomes:

- ✓ Understand the rights and responsibilities for workplace health and safety according to the Health and Safety at Work Act 2015
- ✓ Explain the legislative requirements for risk management in the workplace
- ✓ Apply the risk management cycle within your workplace to: identify hazards, assess risks, control the risks, monitor controls and review for continuous improvement
- ✓ Complete any necessary documentation associated with managing risk in the workplace
- ✓ Describe methods used to determine the effectiveness of controls such as audits, statistical analysis, accident and incident registers
