Isolations

Safeguard your workforce by effectively applying isolations to workplace activities, which prevent risk of exposure to dangerous hazards and power sources

Isolations

Safeguard your workforce by effectively applying isolations to workplace activities, which prevent risk of exposure to dangerous hazards and power sources.

This course will give you the necessary knowledge to identify when you need to apply isolation procedures and how to lockout or reinstate machinery. Through simulated exercises you will have the opportunity to conduct multiple tag out and lockout scenarios, to reinforce your understanding and skill application.

Key Learning Outcomes:

- ✓ Demonstrate machinery, lockout and reinstatement
- ✓ Conduct a machinery lockout
- ✓ Conduct a reinstatement following a machinery lockout
- ✓ Apply isolations for different hazardous energy sources (subject to authority requirements following documented site procedures and permits)
- ✓ Identify how isolations are verified as achieving zero state

ISOLATIONS

Unit 25043	Lockout and reinstate machinery in the workplace
Attendance Prerequisites	Hazard and Risk Management is recommended
Reassessment	Half Day (4 hours)
Availability	<ul style="list-style-type: none"> ✓ Nationwide at one of our training centres ✓ At your own site or workplace
