

Confined Space – Entrant Only

Acquire a comprehensive understanding
of the hazards and controls used when
working with confined spaces

Confined Space – Entrant Only

Acquire a comprehensive understanding of the hazards and controls used when working with confined spaces.

This course will provide you with knowledge of the legislative requirements and an understanding of how to identify the associated hazards, applicable control measures and monitoring and testing requirements when working with confined spaces. It will also cover the responsibilities and duties of people entering or conducting observation duties.

Key Learning Outcomes:

- ✓ Recognise the legislative requirements associated with working in a confined space
- ✓ Assess the level of harm from hazards and determine the suitable controls needed
- ✓ Demonstrate knowledge of gases, their causes, their harmful effects and correctly select and explain the purpose and operation of gas detectors including the safety checks and certificates required
- ✓ Understand the responsibilities and duties of people entering confined spaces or conducting observation duties for confined spaces
- ✓ Determine the legal documentation requirements for the entry, define the necessary considerations on an entry permit form, complete an entry permit form and all additional relevant documentation
