Rigging and Slinging (Dogman) Refresher

Refresh your understanding of the requirements set by the Approved Code of Practice for Cranes to operate as a Dogman slinging loads

Rigging and Slinging (Dogman) Refresher

Refresh your understanding of the requirements set by the Approved Code of Practice for Cranes to operate as a Dogman slinging loads.

This refresher course will reinforce your working knowledge of crane operations that involve lifting varied regular loads and safely directing cranes during operations. Included are a series of practical exercises to reinforce your understanding of Dogman responsibilities and ensure you are up to date with the skills needed for carrying out required duties. The course also covers any relevant regulations and new developments in the crane industry.

Key Learning Outcomes:

- ✓ Refresh knowledge of risk management, hazard control, and rigging planning to slinging regular loads
- ✓ Demonstrate knowledge of the difference between regular loads and irregular loads
- ✓ Demonstrate crane industry communication methods
- ✓ Prepare and sling regular loads, and safely direct a crane during crane operations
