

Do you need help choosing the right Hazardous Substances training?

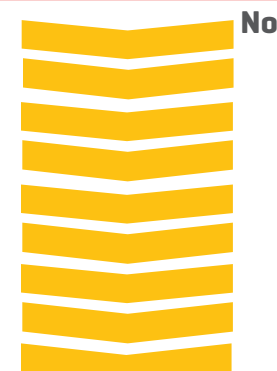

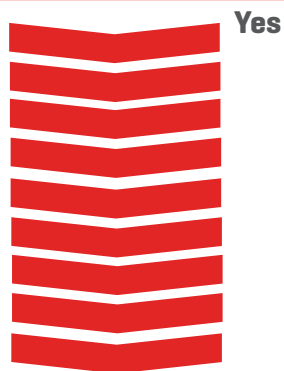

# Answer these questions and find Hazardous Substances training that meets your requirements.

Do you handle substances that require a controlled substance license (CSL), such as explosives, fumigants or vertebrate toxic agents (VTA's)? Do you handle acutely toxic substances, in classes 6.1A or 6.1B?

Have you completed Management & Handling of Hazardous Substances (or hold unit standards 31293 & 31290)?

Do you manage or handle any other types of hazardous substances?

Do you have prior experience in or understanding of working with hazardous substances?

**Certified Handler Preparation Online**  
NZQA Unit Standard 31291

Any person handling the substances described above must hold unit standard 31291.

**Management & Handling of Hazardous Substances**  
NZQA Unit Standards 31290 & 31293

This course is required for anyone looking to become a Certified Handler, as well as anyone who is directly handling hazardous substances.

**Hazardous Substances in the Workplace**  
NZQA Unit Standard 31292

This course is a basic starting point for those directly handling hazardous substances, or working around them. Most people will need this.
