Overview

This course provides learners with the knowledge and practical skills required to safely remove non-friable (Class B) asbestos-containing materials (ACM) and asbestos-contaminated debris. Learners prepare removal work, identify asbestos hazards, establish asbestos removal areas, undertake non-friable asbestos removal, complete decontamination processes, manage asbestos waste, and complete required documentation in accordance with the Health and Safety at Work (Asbestos) Regulations 2016 and industry best practice.

Course Content

- ✓ Plan and prepare for non-friable asbestos removal by identifying asbestos-containing materials, reviewing workplace documentation, assessing hazards, and selecting appropriate tools, equipment, PPE and RPE.
- ✓ Prepare and isolate a non-friable asbestos removal area using appropriate controls, signage, barriers, exclusion zones and safe work procedures in accordance with the Asbestos Removal Control Plan (ARCP).
- ✓ Safely remove non-friable asbestos-containing materials using approved removal techniques, package and manage asbestos waste, and comply with workplace and regulatory requirements.
- ✓ Complete decontamination, site clean-up and asbestos documentation requirements, including clearance processes and records associated with asbestos removal work.

Unit Standard

UNIT 29765 Remove non-friable asbestos
