Height Safety Refresher

Refresh your understanding of the legal requirements and management of proprietary height safety systems and procedures

TRAIN ONLINE OR IN PERSON

Height Safety Refresher

Refresh your understanding of the legal requirements and management of proprietary height safety systems and procedures.

This refresher course will guide you through the selection and inspection of various fall arrest systems and relevant ropes and knots. It also includes a series of practical exercises to reinforce your knowledge of the use, installation and disestablishment of proprietary height safety systems, anchor points, work positioning, restraint systems and developing and implementing a rescue plan.

If you did not complete your original training with Safety 'n Action then we may require evidence of competency
