

# Hearing Conservation

**SAFETY<sup>TM</sup>  
ACTION**

**AXIOM  
TRAINING**

Learn how to identify and manage the risk and hazards associated with hearing loss.

## **Capacity**

12 attendees

## **Duration**

Half Day (4 Hours)

## **Locations**

At our local training centre  
At your own site or workplace

## **Overview**

This course will give you an understanding of the hearing mechanism and the causes of hearing impairment. Practical exercises will teach you how to measure sound intensity and gain a perspective of the hearing comfort zone and the range that would likely cause harm. It will also cover your legal obligations in terms of protecting the hearing of your team.

## **Course Content**

- ✓ Demonstrate knowledge of the hearing mechanism, and the causes of hearing impairment
- ✓ Understand how sound intensity is measured, the hearing comfort zone, and the effects of noise on the hearing mechanism
- ✓ Determine the types of hearing protection equipment and the benefits of using it
- ✓ Recognise workplace hearing protection programme requirements

## **Unit Standards**

**UNIT 17594** Demonstrate knowledge of hearing conservation in the workplace
