Overview

This comprehensive course covers the essential knowledge and skills needed to work safely at heights in accordance with unit standard 17600. Participants will gain a deep understanding of the legislative requirements associated with working at heights, including the Health and Safety at Work Act 2015, relevant regulations, and approved codes of practice. The course explores various height safety systems and teaches participants to identify and control common hazards related to working at heights.

By the end of the course, participants will be well-versed in best practices for preventing falls and ensuring a safe work environment when operating at heights. They will understand their duties and responsibilities as workers, as well as those of PCBUs and upstream PCBUs. With engaging content, practical examples, and interactive scenarios, this course provides a solid foundation for anyone who works at heights or manages employees in such roles, equipping them with the knowledge and skills to prioritise safety and comply with legislation.

Course Content

- ✓ Explain the legislative requirements associated with working at heights
- ✓ Explain the systems suitable for working at heights
