Overview

This course provides participants with the knowledge and practical skills required to safely work at height using safety harness systems. Learners will gain an understanding of fall hazards, harness equipment, safe work practices, and emergency response procedures to help ensure compliance with workplace safety requirements.

Course Content

- ✓ Safe handling and placement of loads within the equipment's rated capacity.
- ✓ Competent, correct operation of a telehandler in line with workplace procedures and safety standards.
- ✓ Awareness of hazards and safe practices when operating in a live workplace environment.
- ✓ Pre-operational checks, including inspecting the telehandler for faults, verifying fluid levels, and confirming safety features are in working order before use.
