

Operate a Telehandler

**SAFETYTM
ACTION**

**AXIOM
TRAINING**

This is a combined course option for bucket attachment and forklift endorsement for the fork attachment.

Capacity

5 attendees

Duration

8 Hours

Locations

At our local training centre
At your own site or workplace

Overview

Telehandler attachments may include buckets, forks or crane. Attachments do not include an attachment that is towed, for example trailers, hay rakes or similar implements used in an agricultural activity.

Please note: This training is only for telehandlers below 7m tall.

Prerequisites

Must have a driver licence and any driver licence endorsement appropriate for the machine or vehicle being used (Usually a Wheels, Tracks or Rollers endorsement).

Must have satisfactorily gained at least 200 hours experience in the operation of a telehandler. They have also competently demonstrated the following tasks as per the manufacturer's operating instructions and company procedures:

- Completed site inspections/checklist.
- Prepared telehandler for operation.
- Completed pre-operational checklists.
- Operated telehandler on a worksite.
- Carried out daily maintenance.
- Reported and took action for any faults.

Course Content

- ✓ Control of hazards associated with operating a telehandler
- ✓ Carry out post-operational procedures
- ✓ Check and prepare a telehandler and attachment before use
- ✓ Operate a telehandler
