Overview

This course builds the knowledge and practical skills needed to safely work with and manage hazardous substances in the workplace. Learners will explore how hazardous substances are classified under HSNO and GHS, how to interpret labels and Safety Data Sheets (SDS), and the potential health and environmental impacts of exposure.

Course Content

- ✓ Explain how hazardous substances are classified under HSNO and GHS systems and interpret hazard information.
- ✓ Identify the potential acute and chronic health effects and environmental impacts of hazardous substances.
- ✓ Apply the hierarchy of controls to manage risks associated with hazardous substances in the workplace.
- ✓ Interpret Safety Data Sheets (SDS) to determine safe handling, storage, emergency response, and disposal requirements.
- ✓ Implement organisational procedures to support safe storage, handling, monitoring, and emergency management of hazardous substances.

Unit Standard

- UNIT 31290** Demonstrate knowledge of safe management and potential adverse effects of hazardous substances in the workplace
- UNIT 31292**
- UNIT 31293**
