At your own site or workplace

Overview

This course provides learners with the knowledge and practical skills required to safely remove friable (Class A) asbestos-containing materials (ACM) and asbestos-contaminated debris under controlled conditions. Learners prepare removal work, establish enclosures and decontamination systems, undertake friable asbestos removal, complete decontamination processes, clean up worksites, and complete required asbestos documentation in accordance with the Health and Safety at Work (Asbestos) Regulations 2016 and industry best practice.

Course Content

- ✓ Prepare for friable asbestos removal by reviewing survey information, workplace procedures, regulatory requirements and asbestos removal documentation.
- ✓ Identify friable asbestos materials and associated hazards and determine appropriate controls
- ✓ Select and use appropriate PPE and RPE in accordance with AS/NZS requirements
- ✓ Prepare the removal site, establish exclusion zones, signage, decontamination units and required plant and equipment
- ✓ Isolate asbestos removal areas using suitable enclosure and containment methods

Unit Standard

UNIT 29766 Remove friable asbestos
