Power Tool Practical Seminar

Practical guidance for the safe initial use and operation of common power tools in the workplace.

Capacity

12 Attendees

1/2 Day Workshop

4 Hours

Locations

At your own site or workplace

Overview

This course provides practical, risk-based guidance for the safe setup, initial running, and operation of common power tools in the workplace. Learners are introduced to key hazards and controls, including pre-use inspections, guarding, electrical and battery safety, correct handling and body stance, PPE selection, and basic post-use care.

Aligned to HSWA duties and good-practice guidance, the course supports safer work practices during induction or refresher training.

Course Content

- ✓ Identify common hazards associated with the initial operation of power tools.
- ✓ Carry out pre-use inspections and basic functional checks in accordance with workplace procedures and manufacturer instructions.
- ✓ Demonstrate safe operating practices when using selected power tools.
- ✓ Apply appropriate risk controls, including PPE selection and safe work positioning.
- ✓ Explain basic post-use care, storage, and fault-reporting requirements.

Examples of tools we can deliver training on:

Drills
Circular Saws
Grinders
Sanders
Jigsaws
Impact Drivers
Ratchet Gun

Cordless Drills
Reciprocating Saws
Nail Guns (some models)
Air Nailers
Staplers
Spray Guns
