At your school

## Overview

This course will give you the skills to identify the difference between hazards and risks in the workplace or job role and carry out a risk assessment for specific workplace scenarios. You will also learn about the effect of uncontrolled risks and how they can affect not only the workers, but the organisation and the environment as well. In a practical exercise, you will prepare a work method statement and undertake a job safety analysis

## Course Content

- ✓ Demonstrate knowledge of workplace health and safety legislation
- ✓ Ability to identify, control and monitor risks in the workplace
- ✓ Prepare and undertake a job safety analysis
- ✓ Understand how to describe the principles of health and safety risk assessment
- ✓ Application of health and safety risk assessment to a job role in accordance with regulatory requirements and industry good practice
