

Hazardous Substances in Agriculture

**SAFETY^N
ACTION**

**AXIOM
TRAINING**

Gain the essential skills to safely handle, store, and apply hazardous substances in agriculture

Capacity

12 Attendees

Duration

8 Hours

Locations

At our local training centre
At your own site or workplace

Overview

This course equips agrichemical users with the skills and knowledge to handle, apply, and store hazardous substances safely while complying with New Zealand's regulatory requirements. It is designed for those managing a single site or supervising others in agricultural settings. Successful completion qualifies participants to handle highly toxic agrichemicals.

Prerequisites

Students need to have 3 months of work experience in the industry prior to doing the course.

Course Content

- ✓ Safely and responsibly apply agrichemicals with minimal risk to human, environmental, and animal health
- ✓ Understand regulatory and market requirements for agrichemical use
- ✓ Learn your legal obligations under New Zealand legislation regarding the use of agrichemicals

Unit Standards

- UNIT 21563** Describe hazard classification systems, and the safe and responsible use of agrichemicals
- UNIT 27215** Prepare to apply and apply agrichemicals using hand held equipment
