At your own site or workplace

Overview

This course provides learners with the knowledge required to identify asbestos-containing materials (ACMs), understand the health risks associated with asbestos exposure, recognise where asbestos may be found in workplaces and buildings, and follow appropriate procedures when asbestos is identified. Learners will develop an understanding of asbestos regulations, safe work practices, identification processes, reporting requirements, and asbestos management procedures applicable to their role.

Course Content

- ✓ Identify asbestos-containing materials, their common uses, and locations where asbestos may be present in workplaces and buildings.
- ✓ Describe the differences between friable and non-friable asbestos, how asbestos fibres are released, and the health effects associated with exposure.
- ✓ Follow the correct process for identifying potential asbestos on a worksite, including consulting asbestos registers and management plans.
- ✓ Describe the procedures for managing asbestos in the workplace, including identification, isolation, reporting, removal, and disposal requirements.

Unit Standard

UNIT 2138 Demonstrate knowledge of asbestos and safety procedures
